

## Henley Type Fuse Extractor Tool

The Henley type fuse extractor tool offers an easy, simple and economical method to safely remove or install Henley overhead fuse carriers. The Henley type fuse extractor is designed to provide positive control of the fuse barrel while loosening and retracting the carrier. The Henley type fuse extractor is designed to be used with existing overhead line operating rods. Requires no special stick movement or procedure to operate.

The Henley type fuse extractor is made from nylon providing years of trouble free operation.
