### POWER SUPPLIES

For any unit which is fitted with a VEPAC internal battery charger.

## HOW CAN I TELL WHICH BATTERY MY K9 or K10 WORK LIGHT IS FITTED WITH?

Most K9 and K10 units have a coloured lozenge on the serial label, also on the label on the light head of the K9. This will be one of six types as shown in the table above. If there is no clear lozenge please contact our sales team and they'll be able to confirm which type you have from the product code on the unit.
